on dry skin

Feature 2

► Feature 2

Why is the “Hydrolized collagen” good for cosmetics?

Maximize skin fibrous density and improve elasticity

The hydrolized collagen ingredient is obtained by hydrolysis of protein in seaweeds, etc, and it creates a resilient cell tissue and helps strengthen skin barrier.

Prevention of skin aging

It is rich in collagen and elastin, and it protects the fiber proteins in the folds and prevents wrinkles.

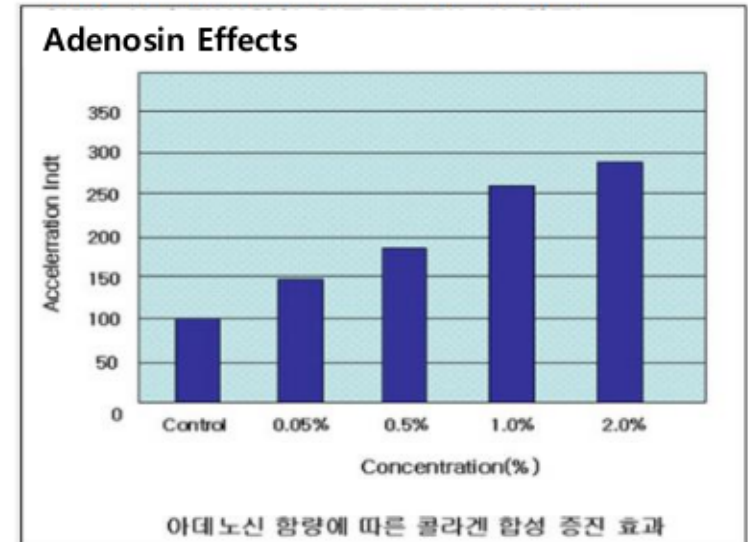

Increased skin moisture retention

It strengthens skin moisture barrier to increase skin's natural moisture retention and makes skin moist.

Feature 3

▶ Feature 3

Adenosine is the ingredient admitted by KFDA.

Effect for increasing Collagen synthesis according to Adenosine's volume

Adenosin help skin retain water and stay moisturized by helping promotion of collagen,
And it help improving wrinkle and elasticity of skin .
